

Deepanjali Sarna (She/Her)

Game Designer

www.deepanjalisarna.com

Gamer-turned-game designer, I conjure worlds fueled by stories, pixels, and the occasional cat cuddle. With experience designing for mobile F2P games, I specialize in levels, economies, and live ops. Launching player-facing features and refining them with data-driven magic. Blending creativity with strategy, I craft experiences that engage, retain, and delight players.
